# Our Capabilities

With a strong financial standing and increased headcount

We are looking to develop and increase the company's client base and reach

We have 3 divisions within the business

1

## Projects Division

- Residential
- Commercial
- Education
- Healthcare
- Mixed-Use Developments

2

## Agility Division

Our flexible offering to suit all commercial and specialist fit-out projects with the reactive and fast track expertise required in this sector

3

## Aftercare & Maintenance Division

Providing bespoke maintenance contracts to both completed projects and external property managers portfolio

# The Detail

Headed by The Senior Project Manager, Delivery Team deliver engineering excellence on time

- providing responsive MEP solutions

Our sequencing is programme driven with every aspect analysed, 'evaluated with a cause and effect' matrix used and distributed to the client's delivery team

We have an in-house 'traffic light' system which tracks progress of all duties – this is managed by the Senior Project Manager with the respective Mechanical and Electrical package managers updating daily

This will also incorporate our purchasing departments 'due for delivery' schedules and provides an overview to both the clients and production team

We bring innovation through CPD packages

Collaboration/Interfacing with other trades is a key element to the outcome of the project

All meetings are recorded and circulated to management with any areas of concern highlighted

We will request regular meetings with the proceeding & prevailing trades for progress updates. This continues throughout the duration of the project without fail

During the meetings 'look-ahead' schedules are also reviewed with updates to the procurement team and subsequently relayed to our suppliers

# Our Values

20+ projects

Staff directly  
employed  
16+

Apprentices  
5+

Sectors

- Commercial
- Residential
- Leisure
- Healthcare

## Collaboration

Working together in excellence

## Innovation

Engineering precision, precision, progress

## Consistency

Reliable, precise, efficient

## Quality

Durability, performance, integrity in engineering

# OUR APPROACH

POWERED BY  
PASSION

DRIVEN BY  
INTELLIGENCE

DELIVERING  
DREAMS
